

1.15 Bar MAP and Altitude Sensor

This Spitronics 1.15Bar map sensor manufactured inhouse. It can be with current and older software. Below are calibration values for Ver 3.7. For older software see the Map calibration instructions in its manuals. In the [MAP and Altitude Sensors](#) document you can get more info on how to precisely calibrate your sensor to suit your application best.

Specifications

15 - 115 kPa

180 – 4.65 mV

Calibrate for Maximum Scale

Zero Offset = 0

Range Gain =199
