

Venus3 and Orion2 Race Pack Features

Race Pack features will become available with this activation. Depending on firmware availability and the number of drivers available in your application, the following features can be accessed.

Full Sequential Injection for 4 Cylinder engines.

Full Sequential Spark for 4 Cylinder engines.

Injector Trimming for 4 Injectors.

Dual injectors per Cylinder.

Launch retarded timing up to 30°ATDC.

Launch Recover Delay.

Anti-Lag Control.

Flat Shift Control.

Please confirm with your dealer about your required features for your engine to make sure it will be available in that firmware. Alternatively look at the [ECU Firmware Classes chart](#) for the features available in that specific firmware.
